Site Prep Checklist

Get your space ready before your Big Ridge island arrives.

BIG RIDGE OUTDOOR LIVING

ISLAND FOOTPRINT

Bull 6 ft (BULLPF4L)	72" W x 31" D
Bull 8 ft (BULLPF2L, BULLPF13L)	96" W x 31" D
Coyote 6 ft (CPKG3G, CPKG4G, CPKG3P, CPKG4P)	72" W x 29" D
Coyote 8 ft (CPKG13G, CPKG13P)	96" W x 29" D

Every island is 37.5" high to the countertop. Allow extra room around it for the grill hood, doors and walking space.

CHOOSE THE SPOT

- Pick a level, solid surface such as a concrete pad, pavers or a deck that can carry the island and appliances
- Leave room to open the grill hood, doors and drawers, and to walk around the island
- Keep the grill out from under combustible roofs and overhangs, and follow each appliance manual for clearances
- Leveling feet take up small dips in the surface

FUEL AND POWER

- Choose propane or natural gas for gas grills and griddles when you order
- Coyote pellet grills run on wood pellets and a 120V outlet
- Venting for each gas appliance is built into the island
- Plan a 120V GFCI outlet within reach for grill lights, pellet grills and refrigerators

DELIVERY DAY

- The island ships by freight as finished modules
- Clear a path from the drop off point to the patio, including gates, steps and tight corners
- Inspect every box and note any damage on the delivery receipt before you sign

ASSEMBLY

- Modules bolt together with the included hardware and tools
- Plan on two people
- Level the island, then set the appliances in their openings

WHAT COMES WITH THE ISLAND

- Finished modules with your side finish and granite countertop
- Openings sized for the included Bull or Coyote appliances
- Hardware, assembly tools and leveling feet

WHAT YOU PROVIDE

- A level, solid surface in the spot you choose
- A natural gas line or a propane tank for gas appliances
- A 120V GFCI outlet and two people for assembly day
